

horizontal beams supported on the said posts,
of an inner arch secured with its ends on the
said posts, and an outer arch held concentric
to the inner arch and fastened to the same by
5 radial posts, the ends of the said outer arch
being supported on the said horizontal beams,
and the vertical bars G' G^2 extending from
the upper faces of the inner ends of the hori-

zontal beams and fastened to the lower faces
of the radial posts at their upper ends, sub- 10
stantially as shown and described.

JOHN TALCOTT WELLS.
